

Durashade

SPECIFICATION
V1

INTRODUCTION

The Durashade collection of rigid PVC vertical blinds combines practicality and style. Durashade offers contemporary designs with the added benefits of durability and functionality. Suited to an office or medical environment, the collection is flame retardant (tested to BS5867) and easy to maintain and clean; with no requirement for stabilising chains or bottom weights, the Durashade collection resists the growth of bacteria and mould, making it ideal for moist conditions.

Comprised of 8 ranges in various colours and textures from linear and double-sided designs to metallic hues and high gloss, the collection meets the desires of interior trends for the ultimate in stylish functionality.

Punch hole size – 6mm (wide) x 4mm (height)

Hole punch position – 6mm from top of slat

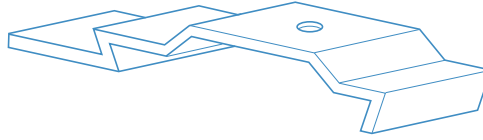

Finished cut slat is curved at top and bottom

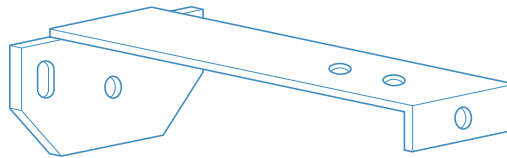

Sloping headrails are available on request. Longest drop, shortest drop and slope width measurements are required when ordering, in recess size. Max. recommended angle of sloping blind is 35 degrees of the horizontal position.

Wand control is available at no additional cost. **Not available on slopping headrails.**

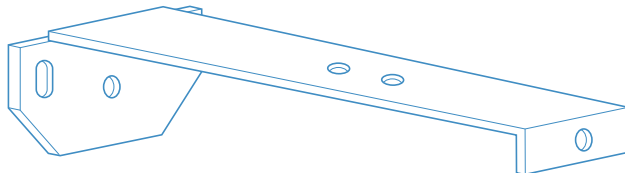

Top Fix Spring Bracket

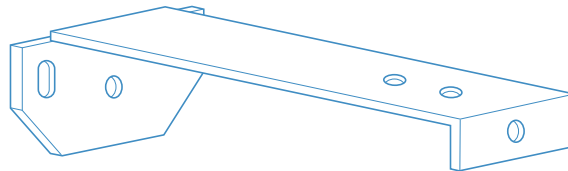

Shallow Frame 89mm

Shallow Frame 135mm

Shallow Frame 127mm

MAINTENANCE

The product is low maintenance; however, we recommend that regular visual checks are completed to ensure that no components have been damaged, which could result in operating difficulties and/or cause a safety risk. If any maintenance is required, we recommend that the work is carried out immediately by a reputable blind company.
