#### MOUNTING TYPE AND SIZE DEFINITION

	Inside Mount (IM)	Outside Mount (OM)
Mounting Position	Blind fits within window opening	Blind overlaps window opening
Order Size	<b>Window opening size:</b> Provide the smallest measurement from the top, middle and bottom measurement. Top measurement is critical because the headrail must fit. Measure the height left, center and right and provide the biggest height.	<b>Net size:</b> Measure the desired width and height. To minimize light leakage, the blind should overlap the window opening at least 50mm on each side and at the bottom.
Finished Blind Size	Width = Order width - 9.5mm Drop = Order Height	Width = Order Width Drop = Order Height

Finished blind width is equal to slat length; finished blind drop is measured from top edge of headrail to bottom edge of bottom rail with slats in closed position when blind is fully released.

Tolerance on width:  $\pm 2\text{mm}$ ;  
 Tolerance on drop: 0~10mm.

#### NOTICE FOR CORDED VENETIANS (SMART PRIVACY)

To ensure the operation at cord lock side, if the blind is installed close to the wall, please specify on the order form, and also inform on the order the distance from the cord lock side to the wall when it is less than 60mm.

#### SIZE LIMIT

Blind Type		Width				Height

## MULTIPLE BLINDS ON ONE HEADRAIL (SURCHARGE)

[BACK TO MENU](#)

2 on 1 headrail

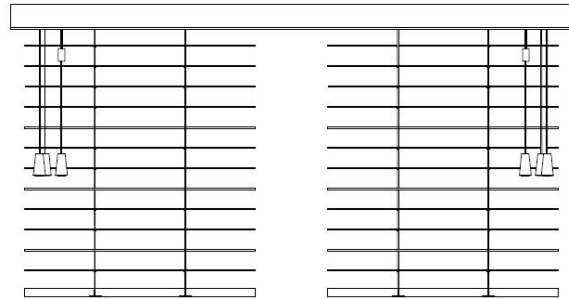

3 on 1 headrail

- Alignment of slats is not guaranteed for multiple blinds on one headrail.

## COMMON VALANCE

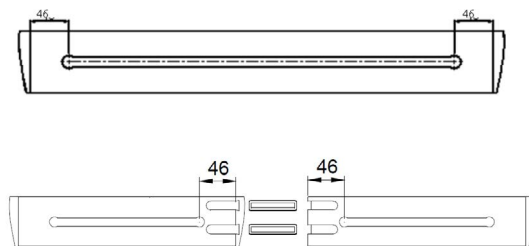

- If you require one valance to cover side by side blinds, please use special instructions on the order card to advise us of valance length required.
- Common valance is used for side by side blinds sharing one valance.
- Alignment of slats is not guaranteed for the side by side blinds.
- Valance will be spliced if length exceeds 3100mm in paint and 2500mm in stain. We will supply valance connector for joining.
- Minimum gap size between two blinds is 8mm

NB. For Smart Privacy blinds, the alignment of the slats cannot be guaranteed in the specs under 'General Specifications' Mounting Type and Size Definition..

## GROOVE FOR VALANCE

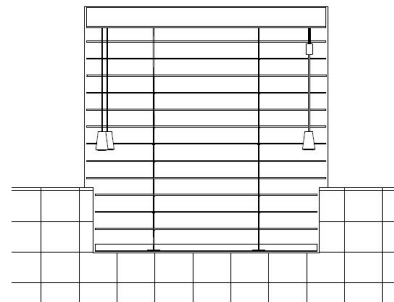

- For the common valance or custom valance size, the valance will be made with groove as per the adjacent drawing.
- If the common valance or custom valance size exceeds the limit and needs to be split, the valance will be made with groove as per the adjacent drawing.

## CUT-OUTS (SURCHARGE)

A cut-out is a blind with an area removed from it to avoid an existing obstruction.

Please provide detailed measurement of the area to be removed. Mark your measurements on a template of the cut-out to ensure a perfect fit to your window.

### 10 Osmo finish options

What is OSMO? The OSMO color is made from natural plant oil and vegetable wax, so it's free of harmful substances. It's a very safe paint. Since OSMO color is permeable paint, which can prevent the degradation of the slats and present the exquisite grain of Normandy blind. It's a good-looking and health-friendly color series. All of the OSMO colors are special stains that enhance the wood grain and therefore the final product may appear different than the samples due to natural variations found in wood.
